Structural engineering

STATEMENT BY FIRM James W. Sewall Company (Sewall) is a full-service consulting firm based in Old Town, Maine. The company offers a wide range of professional services, including engineering, surveying, construction management, land use planning, Information Technology Services [including web, mobile and Geographic Information Systems (GIS)], consulting, aerial mapping and photogrammetry, and forest resource consulting. The Engineering Division includes professional engineers, professional land surveyors, GIS analysts, and technicians with expertise in virtually every discipline of civil engineering, including site design and permitting, structural, hydraulic, environmental, and transportation engineering. Sewall was established in 1880 by a civil engineering alumnus of the University of Maine. In its early days, the firm established a market niche in surveying and forestry appraisals for private and public sector clients, while also performing modest public works projects for Old Town and surrounding communities. Since that time, Sewall has expanded to include over 85 employees and seven corporate offices in six states: Alabama, Georgia, Florida, Minnesota, South Carolina, and two offices in Maine (Caribou and Old Town). Sewall has built its business over the years by establishing collaborative long-term partnerships with its clients. Sewall's professionals assist public and private sector clients throughout the United States, Canada, and overseas with projects that range in size and scope from local municipal peer review services to large multi year geocoding contracts in major metropolitan areas. Throughout its 135 year history, the company has operated under private ownership with the corporate headquarters remaining in Old Town, Maine. David Edson, LPF, serves as President / Chief Executive Officer. The Vice President of the Engineering Division is Scott E. Graham, P.E. Sewall is an equal opportunity employer with an established policy for affirmative action in its hiring program.
